Axicon 6515

Mid-size barcode verifier

The Axicon 6515 barcode verifier has been designed to read linear barcodes with a width of up to 125 mm (4.9") including quiet zones. This means only one verifier is needed to check all your GS1 barcodes - EAN/UPC, ITF-14 and GS1-128 - if the outer case and logistics label barcodes are not at their maximum size. For companies using a 100 mm (4") wide thermal transfer printer for all their outer case barcode labelling, this verifier is perfect. It is used by manufacturers worldwide.

Features

Lightweight and portable, needing only a USB connection. Verifies to ISO/IEC standards, with ANSI reporting as an option. Results are immediately displayed on screen, and reports can be printed or e-mailed for remote diagnosis. Reports may be saved automatically to support ISO 9001 quality control procedures.

Software

Designed to function with any PC running any currently supported version of Microsoft Windows, or the Axicon PV-1000 portable display unit. Software is always updated to meet latest requirements of the GS1 General Specifications, and is available free of charge from our website.

About Axicon

Axicon Auto ID is a world leader in barcode verification, having developed and manufactured our own range of verifiers since 1989. Axicon barcode verifiers are used to measure the quality of linear and matrix barcodes, on all levels of product packaging.
